

Massivit 3000

Step into the 3D Business World with the New, Affordable Massivit 3000!

The Massivit 3000 delivers an unparalleled combination of production speed, exceptional part quality, large print volume, and an unbeatable price point! The Massivit 3000 makes large-format 3D printing accessible to a range of forward-thinking businesses such as print service providers and entertainment fabricators. It allows companies to grow their business, increase their profit margins, and gain a competitive edge by offering new applications, and providing high precision to ensure design fidelity. Based on proven Gel Dispensing Printing (GDP) technology, already adopted in 40 countries, the system enables extraordinary, large-size activations to be produced with ease including unique 3D window displays, custom channel letters, 2D/3D point-of-purchase displays, dimensional billboards, interactive event props, and more.
